I highly recommend it if you have seen, and liked the movie. It will probably win an oscar for best cinematography. The book gives all the little details about the movie, and all my god, the pictures are incredible. from Cefalonia with love

The island of Cephallonia is now familiar as the setting of the novel Captain Corelli's Mandolin. This book explores the turbulent history of the island, focusing on the World War II years of Italian occupation, as well as telling the behind-the-scenes story of how the film version was made. The filmmakers have added their own visions, carefully explained here in an official companion to the movie, and de Bernieres' introduction shows how he anticipated that. All he could do to ensure respectful treatment of his novel was insist it should not be sold to Hollywood. The history of the filming is itself fascinating the search for the cast, the locations, even the guns for the battle sequences. Film journalist Steve Clark has done a good job here, aided and abetted by the stunning Greek island setting and ample action and character stills from the film.
