German Guns of the Third ReichBy william gentnerThe best part of this book are the pictures. Most of these pictures I have never seen and my guess neither have you. The author's literary skills are lacking but he gives you enough information that you could almost build a flak gun. I was expecting more on WWII German tanks, but the book skip over this tactical armament. Again, enjoy the pictures!!!3 of 3 people found the following review helpful. detailsBy Jim Carone--Capt.Book is 7 1/2 X 9 3/4--128 pages, stiffback, no DJ, semi gloss paper, 256 photos. This book does not cover small arms. It is for the heavy weapons specialist. It starts with the small infantry howitzer and goes up to the massive railway guns. It covers flak, armed trains, tow and flak vehicles. hope this helps. Cap

German Guns of the Third Reich is an illustrated record of German light and heavy artillery, heavy mortars, anti-tank and anti-aircraft guns at war. Using previously unpublished photographs, many of which have come from the albums of individuals who took part in the war, it presents a unique visual account of the various German guns that were deployed for action between 1939 and 1945. The book analyses the development of the German gun at war and shows how it became of decisive importance for the preparation and the successful conduct of attack and defense. It describes how German forces carefully built up their assault forces utilizing all available guns and making into an effective killing machine. It shows how various Panzerjäger and Panzergrenadier units fought on the battlefield using a host of antitank guns with lethal effect. Throughout the book it depicts life as a gunner, how the guns were deployed for action, and illustrates the various modes of transport that were used to move the guns from one battle front to another.

Each chapter details the various guns that went into production and eventually saw action on the battlefield.

About the Author Ian Baxter has produced a fine selection of highly illustrated books in the Images of War Series mainly covering Axis Forces in WW2. He is a dedicated collector of rare images and an expert in his field. He lives near Chelmsford, Essex.
