Lots of useful knowledge and great tool for current firearm pricing.My main goal is to simply inform a potential customer of any positive or negative attributes about the product and its effectiveness or performance, just as I would like to know for myself. My review is solely based on my personal experience with this product and hope that this review helps with your decision to purchase. If you find that this review was at all helpful, I simply ask that you indicate so by voting the YES button below. Happy Shopping!5 of 5 people found the following review helpful. This is a good book and I recommend that every serious shooter have ...By R. M. K.This is a good book and I recommend that every serious

shooter have it in their library. It is a quick way of looking up a gun that you hear about or checking to see what gun a specific company manufactures. I have found the address list in the rear useful to find the current address of companies in the firearms business. The only negative is that you really only need to buy to buy this book every couple of years as it doesn't change that much from year to year!0 of 0 people found the following review helpful. A lot different from what I thought was being soldBy tgivOK, admitting I'm a bit harsh rating this 2 stars when so much information is packed into this gun bible.It's all about pie in the sky disappointment, expectations, not even the money spent.I bought this because I respected the gun trials, hands on evaluations with which I fully agreed and wanted more of that, much more in an easy to read find specifics than teased via gun-tests on line ... the advertiser of this book.1. The Trials occupy only a mere a quarter's width of pages in a book comparable in girth to a Bible. Rats.2. The lists of guns - similar to Genitron results - should also list Recoil, Muzzle ft/#, trigger pull #s and all other clandestine specifications even some manufacturers don't advertise. Smart buyers enthusiasts have inquiring minds and want to know from a bible instead of all this Forum guff based upon opinions.3. One can learn about some new items, e.g. Kimber's new revolver K6s 357mag-6 w/match trigger, hammerless! p.268 \$900 but these are rare.4. I promise to upgrade my review (as if it matters to anyone) once I have more time to read appreciate it for what it is.Still looking for my ideal Gun Test bible, love those guys and how they think.
