It's a copy of the previous Gun Digest with some minor updates in the catalog pages of firearms and ammunition ballistics, as well as accessories. It's not worth buying if you have last years gun digest. There are perhaps two or three interesting articles but a lot of them are out in left field, wierd, or of the who cares variety. I got swindled even at s cut rate price. Last time I buy one of these "blivets" without a personal perusal.

Shooters, collectors and students of the gun continue to expect the best from "The World's Greatest Gun Book" and

this 56th edition will exceed all expectations. A new full-color section reveals 30 eye-popping photos of some of the best engraved and custom guns available today. All-new feature articles, fresh new product reports, and a completely updated catalog and reference section fill this new edition. The articles represent the best writing on diverse firearms-related topics including scopes and mounts, European guns, handloading and rifle, shotgun, and pistol reviews. Contributing authors are authorities on topics such as history, handloading, collecting rifles, shotguns, handguns and much more. The helpful Directory of the Arms Trade section is also fully updated. The heavily illustrated catalog section highlights the most recent models of handguns, rifles, shotguns, muzzleloaders and airguns, plus the latest accessories including reloading equipment, optics, sights, chokes, and brakes. -Full-color photos of today's best engraved and custom guns -Completely updated catalog and reference section -Fresh new product reports -All-new feature articles
